# How to make a MetaMask (ETH Wallet)
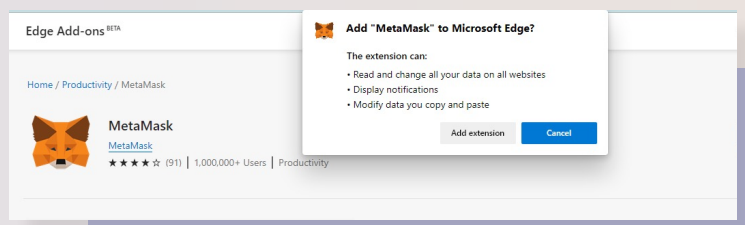

—

Disclaimer » Only to be used for Ethereum based tokens (ERC tokens)
Do not deposit tokens like BTC, BNB into this wallet.

**1**   Head to metamask.io
Click download.

2   Select the appropriate
platform (If you're using
chrome – there will be an option)

Click install.

3   Add the extension to your
browser, this can be located
in the in the jigsaw next to
the right of the search bar.

❹ Click get started.

Welcome to MetaMask

Connecting you to Ethereum and the Decentralized Web.

We're happy to see you.

Get Started

❺ You should have two options here.

Click create wallet.

Yes, let's get set up!

This will create a new wallet and Secret Recovery Phrase

Create a Wallet

Improve MetaMask

...d like to gather usage data to better understand how our users ...s data will be used to continually improve the usability and user exp... the Ethereum ecosystem.

...will..

...allow you to opt-out via Settings

...nonymized click & pageview events

...ollect keys, addresses, transactions, balances, hashes, or any personal ir...llect your full IP address

...data for profit. Ever!

...nks   I Agree

New password (min 8 chars)

Confirm password
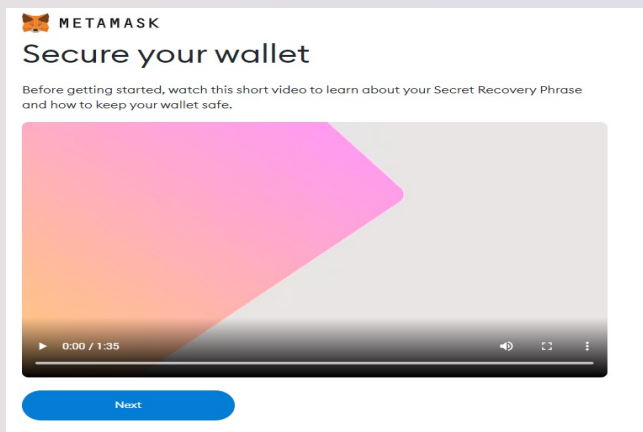

☐ I have read and agree to the Terms of Use
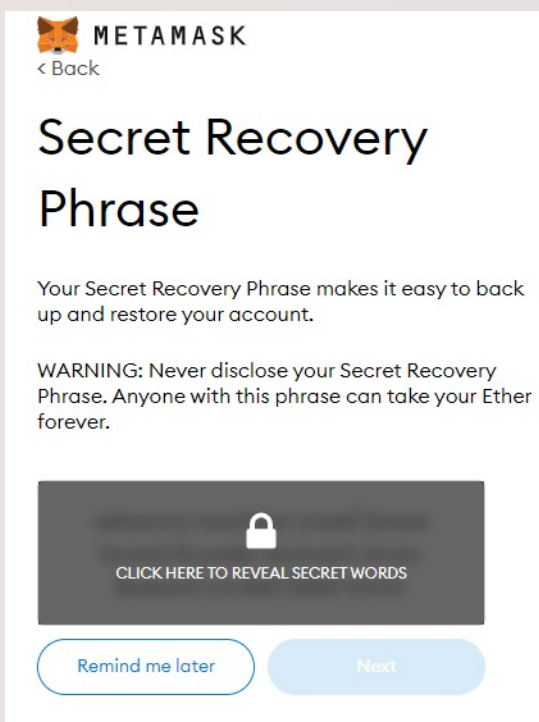

Create

❼ Create a password.

8 It will be helpful to watch this video on security.

Once watched, click next.

9 This part is **very important. Reveal your recovery phrase, then write it down.**
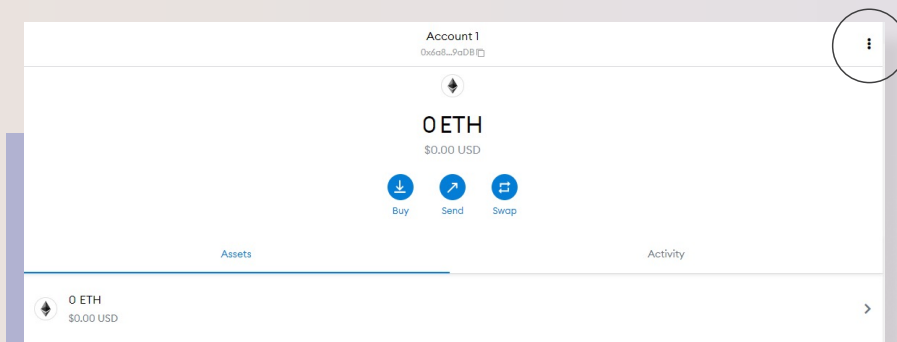

You will need this if you ever want to log into another device/recover your account – so store it in a safe place.

Once done, you will be asked to input your phrase in the correct order.

10 **You will now be logged into your Metamask wallet.**

You can click on "account 1" to copy your Ethereum address (this is needed to receive funds, essentially your bank account number).

You can edit the account name by clicking the 3 dots to the right and selecting account details.
