# How to wrap & unwrap ETH

—

When you list an NFT – it will be listed in ETH, however if someone was to make an offer, they make that offer in **wrapped ETH (WETH)**.

» When you receive WETH you will want to unwrap it to ETH.
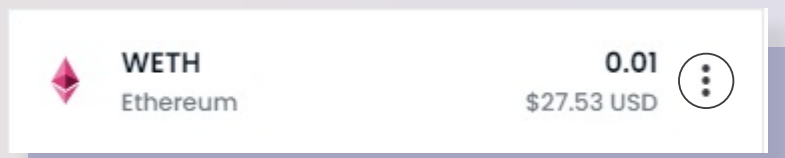

❶ Go to opensea.io.

Click the wallet image in the top right of the page. It will bring up this menu.

❷ You will see a symbol underneath ETH that is WETH. Click the 3 dots next to amount and click **unwrap**. Enter the amount you wish to unwrap.

(There will be a small eth fee).

❸ Sign the contract to confirm and your ETH will be unwrapped.

- This will work the same way if you want to wrap the ETH — just click the 3 dots that you see in the first image and click wrap.
